There may be occasion when a provider needs to refer to a previous service delivery e.g. either for audit or post payment verification. If a service entry in the history screen is clicked it will open to show the data captured at the time of service delivery, you may need to do this if a commissioner highlights

a data entry anomaly.

A filter is built in to PharmOutcomes to simplify the search process when looking for data attached to historical service delivery. If you know the unique ID that has been applied to a service delivery you can search for this by simply entering the unique ID in the “search for identifier” tool at the top of the history list. The user can also search for a service type delivered by clicking on the “click here to view or edit all provisions” tab at the bottom of the page.

This takes the user to a second screen that has an options list for each service that is being offered by the provider.

Help & Advice

You can restrict the list of provisions to a particular service by selecting from the choices at the top.

You can sort the provisions in order by clicking on the column headings, but you can only do this on the identifiers if you select a single service.

Select Displayed Services

- All
- East Riding of Yorkshire Minor Ailments
- Quit Referrals Accepted
- Level 2 Services
- Show
- Alcohol Scratchcards
- Hepatitis B Vaccination
- NSAID Targeted MUR
- Dry Blood Spot Testing
- Needle Exchange
- Private Influenza Vaccination to NPA PGD
